Property Owner Name: Max Broderick / Lynette Villagomez

Mailing Address: P.O. Box 423 Cannon Beach OR 97110

Phone: 503 440 4870 Email: broderick.mat@gmail.com

Property Location: 1064 S. Elm Street Map/Tax Lot Number: 510293C07003

The city shall issue a tree removal permit if one of the following criteria is met. Please circle the letter of the criteria that applies.

These criteria require a Tree Removal Report from an International Society of Arboriculture (ISA) Certified Arborist:

- A. You are constructing a structure or development approved and allowed by pursuant to Cannon Beach Municipal Code 17.70.030, which involves any form of ground disturbance; including required vehicular and utility access. **SEE ATTACHMENT A – Removing Trees Because of Construction.**
- B. Removal of a tree for the health and vigor of surrounding trees.

These criteria require an ISA Tree Hazard Evaluation Form prepared by an ISA Certified Arborist:

- C. The tree presents a safety hazard, where:
 - 1. The condition or location of the tree presents either a foreseeable danger to public safety, or a foreseeable danger of property damage to an existing structure; and,
 - 2. Such hazard or danger cannot reasonably be alleviated by pruning or treatment of the tree.
- D. The tree was damaged by storm, fire or other injury, which cannot be saved by pruning.

You must submit a tree removal permit with a reason if:

- E. The tree is dead.
- F. Tree removal is necessary to provide solar access to a solar energy system where pruning will not provide adequate solar access:
 - 1. The city may require documentation that a device qualifies for Oregon Department of Energy Solar Tax Credit, or other incentive for installation of solar devices offered by a utility.
 - 2. No tree measuring more than 24 inches in diameter shall be removed for solar access.
- G. Tree removal is for landscaping purposes, subject to the following conditions:
 - 1. The tree cannot exceed 10 inches in diameter.
 - 2. A landscape plan for the affected area must be submitted and approved by the City.
 - 3. The landscape plan must incorporate replacement trees for the trees removed. The replacement trees must be at least six feet in height or have a two-inch caliper; and,
 - 4. The City shall inspect the property one year after the approval of the permit to insure the landscape plan has been implemented.

If your tree presents an immediate danger of collapse and if such potential collapse represents a clear and present hazard to persons or property, please contact the Community Development Director (CDD). If it is determined by the CDD that there is an immediate danger, then a tree removal permit is not required prior to tree removal. However, within seven days after the tree removal, the tree owner shall make application for an after-the-fact permit. Where a tree presents an immediate danger of collapse, a complete ISA Tree Hazard Evaluation Form prepared by a certified arborist is not required. Where a safety hazard exists, as defined by this subsection, the city may require the tree's removal. If the tree has not been removed after forty-eight hours, the city may remove the tree and charge the costs to the owner.

PAID

Attach a site plan showing the location and type of all trees on the property, including the trees to be removed. Indicate the location of replacement trees and the type. SEE ATTACHMENT B – Site Plan. Attach photos of the trees to be removed and mark the trees with ribbon.

Explain how the request meets one or more of the applicable criteria. Include the number and type of trees requested for removal. If appropriate, explain why pruning would not accomplish the same goal as tree removal.

.....

Application fee: \$50.00 for 1-4 trees; \$100 for 5 or more trees

Note: The application fee is a **nonrefundable** fee that is due upon receipt of application, whether the removal request is approved or denied.

Applicant Signature _____ Date: _____

If the applicant is other than the owner, the owner hereby grants permission for the applicant to act in their behalf.

Property Owner Signature: _____ Date: _____

Please attach the name, address, phone number and signature of any additional property owners.

I understand, as property owner, that I am responsible if an approved tree removal permit is violated in any way. As property owner, my signature or an authorized applicant's signature, allows any duly authorized employee of the City to enter upon all properties affected by this permit, for the purpose of follow-up inspection, observation or measurement.

Max Broderick
Vito Cerelli

Project: New Residence construction South end Elm Street, Cannon Beach
Ref. TL 7003. Map 510299C Site plan

Recommended tree removals.

I have identified the proposed trees to be removed as follows:

Tree #1 Alder, multi-stem 20" DBH/ 40' height.

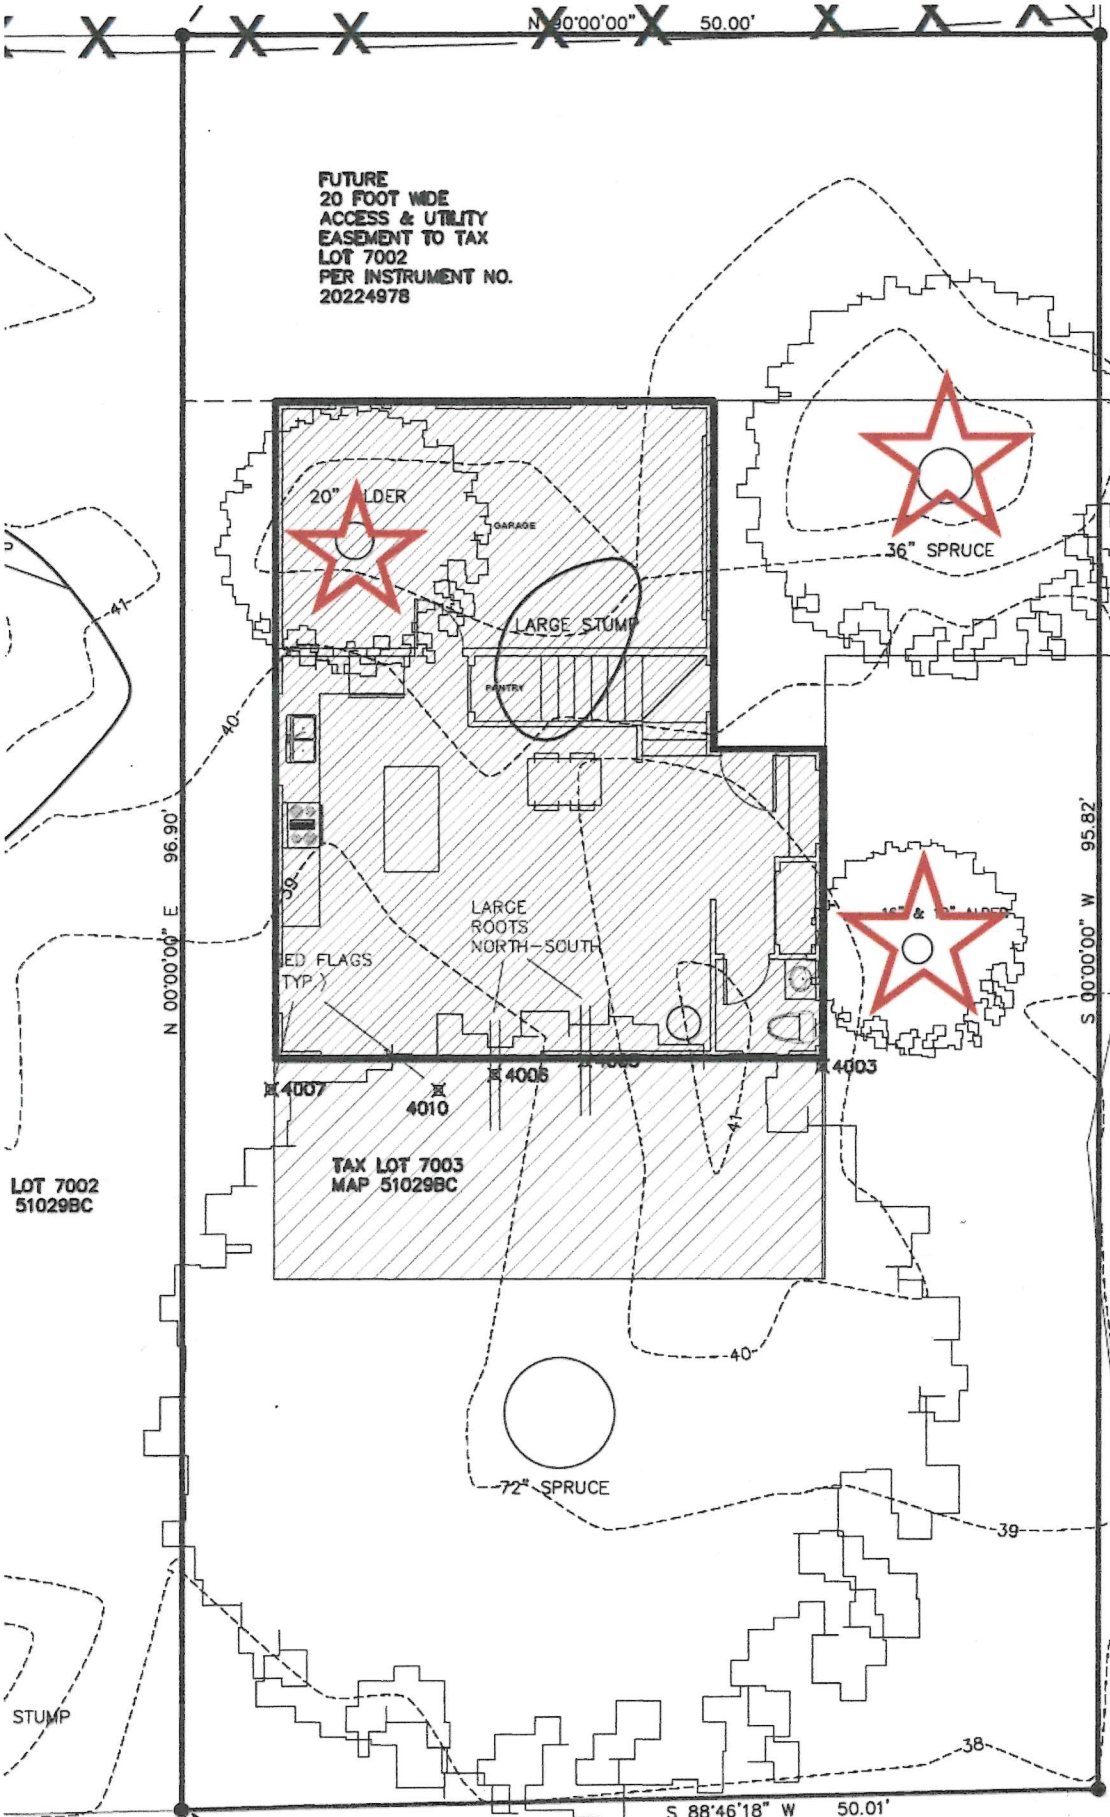

Structural defects; partial decay, double stem included bark, potential for failure (see Tree Hazard Evaluation)

Tree #2 Sitka spruce, 30" DBH, 60' height.

Tree located at east end of driveway wher parking space is required. Remove for access.

Tree #3 Alder 20" DBH 50' Height.

Tree within building envelope Removal necessary for construction.

Tree Removal Permit Application Review - 1064 S Elm

Per your request, I reviewed the Tree Removal Permit Application submitted by Max Broderick. An Arborist Report and ISA Tree Hazard Evaluation Form was included in the application from Certified Arborist Joe Balden. I visually inspected the trees and site on April 14th. It is my recommendation the removal request for 3 trees be approved.

All 3 trees have been flagged with ribbon and can be referenced with the site map and photographs included in the application. Two trees have been requested be removed to allow for new residence construction: a Sitka spruce (*Picea sitchensis*), 30" DBH and 60' tall, and a red alder (*Alnus rubra*), 20" DBH and 40' tall. Both of these trees will need to be removed to allow access for building construction and parking space requirements. A third tree has been requested be removed due to potential for failure: a red alder, 20" DBH and 50' tall. This tree has extremely poor structure that cannot be remedied via pruning or other methods. I recommend the removal request for this tree be granted according to permit Criteria C, "*The tree presents a safety hazard*".

A Tree Protection Zone fence has been established to protect a large Sitka spruce tree located south of the planned construction. I recommend utmost care be had during excavation and home construction to preserve this veteran tree.

Best regards,

A handwritten signature in black ink, appearing to read "Jeff Gerhardt", on a light pink rectangular background.
