Exhibit D-1

Planning Commission Meeting

To Consider new beach front development involving removal of approximately 20 mature trees, new street intersection in the Hemlock S-Curves and new house, all located just south of Haystack Rock as shown. Please come testify in person (6p.m., Cannon Beach City Hall, 163 East Gower Street) and submit written comments to planning@ci.cannon-beach.or.us.

To Our Neighbors and Local Community:

PLEASE TELL THE PLANNING COMMISSION TO NOT:

- Remove city trees too enable this project,
- Create a dangerous intersection in the Hemlock S-Curves,
- Permit a nonconforming street/driveway/bridge in unimproved Nenana Avenue,
- Ignore its ocean shore setback rules,
- Diminish the historically significant Oswald-West cabin, and
- Diminish the natural setting of Haystack Rock

The City should say no to this dangerous proposal. The City has substantial discretion in how its streets are used and should not bend and break its rules to enable the destruction of this cherished place.

Please testify in writing and in person.
