To the Planning Commission:

We are adamantly opposed to the proposed ramp near the Oswald West home. From what we can see in the plan, the structure would not only drastically diminish the aesthetics of the view from the beach but will require construction damaging to the natural elements of the shoreline. Senators Merkley and Wyden have introduced legislation to help communities such as Cannon Beach to protect the coastal shorelines with natural materials. Setback requirements are not arbitrary. They are adopted for the good of the community. Please reject this inappropriate structure. This is a case of "The needs of the collective versus the force of individual will."
