Mr. Adams:

I write to express my absolute astonishment and anger that a project like this would ever even be considered by those charged with the protection of our precious town and its environs. I don't need to list all the ways this project would offend Cannon Beach, not the least defiling and destabilizing land already known to be precarious and at risk of slide once again.

That this project is even being considered is beyond my comprehension, and I cannot state my objections strongly enough. Please stand strong in defense of our fragile environment that depends on your determination to keep it safe.

Thank you.
