Re: Foredune Management Plan  

September 24, 2019

In addition to my comments at the open forum, September 14, 2019, regarding non-native European dune grass, I would like to add a comment regarding “diminish value.” This has been caused by the elimination of the views the properties originally had.

With all due respect to Eminent Domain, when such reduction in value is caused by actions for the “greater good,” there is compensation given to those directly affected. This is clearly measurable. I would hope that this would be taken into consideration by the council.

Respectfully,

Richard J. Rapp
